**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

A poor day, with low cloud and rain leading to some hazardous conditions on the hills. Gusts perhaps near gale at first on very highest summits, but easing.

Forecast for Wednesday 10 Nov 2021

Weather: Rain and drizzle gradually easing south early morning with northern hills likely dry from daybreak. A gradual improving picture through the day, with some sunny spells possible, with best chance across Carneddau and other northern hills. Although some southern areas, such as Rhinogydd perhaps remaining cloudy throughout.

Maximum wind: Southwest 15mph or less.

Chance of cloud free mountain/hill tops above 800m: 30% at first, improving to 70% by midday

Visibility: Poor above 500m at first, before cloud lifts and gradually breaks from hills. Some hills above 600m still seeing periods with cloud obscuring views and reducing visibility through the day, most frequently in the south. Beneath the cloud, views increasing to give some good visibility of distant hills by the afternoon.

Temperature: **Valleys:** Plus 3 Celsius increasing 14 Celsius during the afternoon
At 800m: Plus 5 Celsius
Freezing level: Above all summits
